

What is Series 3 **ProShop** Estimating?

ProShop is the most extensive estimating and management suite for printers and graphic houses on the market today. **ProShop** software is easy to use, understand, and uses printer's lingo, not "computer language". You can create quotes and jobs with ease, then track the job as it progresses through the shop. Real-time Data Collection allows you to quickly see where the job is and follow the profit vs. loss per department before the job is complete!

Tell me more about **ProShop**!

ProShop Management System is a Windows based system. You receive a management system that is completely up to date and can run on the new Windows Vista Operating System, as well as XP and 2000 Pro. **ProShop** has minimum overhead, it can be networked for multiple users on simple peer-to-peer networks, or can be installed on networks offering domains and other security solutions!

What support is offered?

With every purchase of software, the first ninety days of support is included. Support plans provide unlimited telephone and internet access support. You also receive latest updates to the software with no additional cost. MBA also offers on-site installation and training to our customers.

What's the cost?

ProShop is modular based. Your shop can begin with only a few modules that fit your needs now and add more at a later time. With the system being modular based, the prices start at only a couple thousand dollars. It is only cents on the dollar compared to competitive packages on the market.
