PAYROLL

If you want to maintain control of your payroll and payroll taxes, MBA's SERIES 3 Payroll is the solution. Through sophisticated employee tracking, fast paycheck generation, and comprehensive reports, Payroll can deliver greater control and lower your operating expenses.

Payroll transaction entry allows for rapid data entry, yet is flexible enough to handle the exceptions that inevitably arise. Once the employee, department, and payroll record information is set up, Payroll can automatically calculate your checks. You simply review and edit your employees' checks as they are calculated. Federal, State, and Local taxes are automatically computed, as well as FICA, FUTA, SUTA, and SDI deductions and liabilities. The Preliminary Check Report allows you to verify the accuracy of your pay run before printing check batches. Liability and Quarterly reports are invaluable aids in filing reports to taxing authorities.

Multiple payrolls within the same company, each having user-defined earning and deduction categories, may be maintained and processed. Payroll checks can be calculated for both salaried and hourly employees based on pay periods ranging from weekly to quarterly. Several preprinted check formats are provided, or you can use Direct Deposit to have employee's checks deposited into their bank accounts. Checks can also be printed on blank check stock using our special MICR interface.

All Payroll transactions can be posted to the SERIES 3 General Ledger, keeping your financial statements accurate and up-to-date. The departmentalized postings can be specified as either in detail or summary format.

## FEATURES

## SERIES¥ PAYROLL

CHECK PROCESSING• Batch processing allows payrolls to be processed in advance of printing • Several independent payroll runs can be prepared at the same time • Multiple payrolls with different pay frequencies can be set up • Choose from several different check formats • Direct Deposit allows you to assign up to four different bank accounts per employee • Hours and rates can be imported from a text file into a check batch from external sources such as a time card machineHAND CHECKS• Checks can be entered manually for 'after the fact' payroll processing, or to get your beginning balances, as well as employees' earning and deduction totals, entered into the payroll systemEMPLOYEE AND CHECK INQUIRIES• With our convenient 'browse system', you can quickly access all of your employee and check information • View all of the checks for a single employee, along with the earnings and
